ABOUT ME

Product Designer with 4 years of experience in digital products and 6 years of professional experience. Experienced in discovery, information architecture, design systems, prototyping and the evolution of web and mobile products. I build solutions for highly complex platforms in the financial market, collaborating with multidisciplinary teams from defining the solution through to its implementation.

EXPERIENCE

Nelogica — UX/UI Designer

Feb/2024 — Present | Leading fintech in the investment sector

I design web and mobile products for the financial market, collaborating with Product Managers, developers and stakeholders to evolve scalable, accessible solutions aligned with business needs.

- Responsible for the end-to-end design of an international investment platform, working alongside development through to the product launch.
- Structured and documented a Design System for internal systems (intranet and extranet), bringing greater visual consistency and delivery efficiency.
- Designed custom web portals for brokerages, balancing business requirements with usability best practices and interface consistency.
- Evolved the experience of the Profit and HUB3 apps through continuous improvements to the interface and navigation flows.
- Contributed to the continuous evolution of Nelostore, designing interfaces and layouts for institutional and commercial initiatives.

DEx01 — Product Designer

Dec/2022 — Feb/2024 | CX Consultancy — Solution Company

I worked on projects for fintechs, banks and digital platforms, taking part in discovery, research, hypothesis validation and the definition of user-centered solutions.

- Restructured the information architecture and navigation flows of a digital bank's channels, contributing to a more integrated experience across platforms.
- Structured and documented a financial institution's Design System, contributing to greater standardization and delivery efficiency.
- Ran research and usability tests on a skills-based recruitment platform to identify improvement opportunities and guide the evolution of the user experience.

PREVIOUS EXPERIENCE

Before working with digital products, I worked in Marketing, Social Media, Content Writing and Account Management. During that time, I developed communication strategies, produced content for different channels, wrote briefs, followed campaigns, organized events and managed client relationships.
